

BandRite Sealer

For Reliable Automatic Sealing

Ideal for both polyethylene and barrier film, the PackRite BandRite Sealer provides speed and accuracy to maximize the productivity on your line. Simple to operate and easy to maintain, the BandRite automatic band sealer outperforms your expectations – especially when handling notorious packaging challenges such as poultry.

Compliant

The BandRite Sealer is a production-line workhorse that was made for multi-shift industrial operations. An excellent choice for food, agriculture and military applications where government regulations such as MIL-SPEC and USDA packaging guidelines must be met. The heavy-duty BandRite band sealer is compliant, expandable, and easily maintained.

Fast

Your production line demands outstanding speed of output while maintaining seal quality. Usually sold with a conveyor, our reliable BandRite Sealer can run up to 750 in. per minute and seal up to 12 mil single thickness or 6 mil single thickness on bags with gussets (24 mil total).

Versatile

The BandRite Sealer supports a variety of materials and allows for different sealing impressions and widths. Change from one type of bag to another with no tools and virtually no downtime thanks to PackRite's industry-leading and operator-friendly tilt-away drive system.

Model Version

BandRite 6000

Recommended For

Packaging types: food, pet food, consumer products, military, coffee

Shared Specifications

Seal Width	0.375 in., 0.75 in.
Heating Section	10 in.
