

# Band Sealers

## For Reliable Automatic Sealing

Ideal for both polyethylene and barrier film, PackRite's Band Sealers provide speed and accuracy to maximize the productivity on your line. Easy to operate and even easier to maintain, the BandRite and FreshRite automatic band sealers out-perform your expectations – especially when handling notorious packaging challenges such as poultry. Available in two models.

## Durable

PackRite band sealers are production-line workhorses that were made for multi-shift industrial operations. An excellent choice for food, agriculture and military applications where government regulations such as MIL-SPEC and USDA packaging guidelines must be met, the heavy-duty BandRite and FreshRite band sealers are compliant, expandable, and easily serviced.

## Fast

Your production line demands outstanding seals at speed. Usually sold with a conveyor, our reliable band sealers can run up to 750 in. per minute and seal up to 12 mil single thickness or 6 mil single thickness on bags with gussets (24 mil total).

## Versatile

These multi-capacity machines seals a variety of materials and allows for different sealing impressions and widths. Change from one type of bag to another with no tools and virtually no downtime thanks to PackRite's industry-leading and operator-friendly tilt-away drive system.

## Model Versions

<b>BandRite 6000</b>	
<b>Recommended For</b>	Packaging types: food, pet food, consumer products, military, coffee
