

# Automatic Jaw Sealer

## Versatile Motorized Heat-Sealing

PackRite's Automatic Jaw Sealer can process single packages up to 30 items per minute. Providing either continuous-feed or intermittent stop/start sealing via foot pedal, this compact unit guarantees uniformity via automatic dwell time and pressure control for safe, consistent, and long-lasting seals. Available in two models.

## Space-Saving

When space is limited, this compact sealer fits the bill. Taking up just 7 in. by 11.5 in. of bench space, the PackRite automatic jaw sealer sits just 10 in. high when open. This small-footprint sealer can also be mounted at a 30-degree incline to take up even less space or to provide a more ergonomic sealing experience for operators.

## Flexible

With both foot-pedal and automatic operation as well as dual mounting options, this flexible-use jaw sealer accommodates a variety of unsupported films up to 6 mil in thickness. With optional dwell control, this range can be extended even further while continuing to maintain seal integrity excellence and instant package release.

## Intuitive

In whatever operating mode you choose, PackRite's Automatic Jaw Sealer is simple and easy to use. Requiring little training time, this dependable, robust unit can be up and running immediately after installation to start providing you with fast, efficient, and versatile sealing on day one.
